and Guests

Friday, **August 20** - 7 p.m.

at Anchor D Ranch - Rimbey, Alberta

ANCHOR D RANCH

Simmentals

Welcome to our annual Customer Appreciation Day / Corn Roast, and Pasture Treasure's Female Sale. For the past 15 years the "Corn Roast" has been a very special day for us at Anchor D Ranch. It has been our day to gather customers, neighbors and friends, to express our gratitude and thanks. For the past couple of years we have incorporated the "Pasture Treasure's" female sale around this event. This year it will all be combined into one day, and as per usual this will be the social and family event to be at! (smiley face)

The concept of "Treasure's" itself is something we came up with three years ago. It enables you to view sale cattle in the very best form of display possible, Natural. The heifers will come directly off grass, with no extra frills, feed or rigging, and be presented to you the way you will see them the other 364 days of the year. They are bred, fed, and developed to be low maintenance brood cows that will gather you the most \$'s for \$'s invested. The "W" series marks our 25th registered calf crop, and I can say with confidence, this is one the best set of females we have ever offered for sale!! In addition to our own cattle, we will once again have a few guest consignors, who have searched their pens extra hard to bring you a strong representation of their programs. Making the sale complete will be the "Treasure Lot", which will be very unique, and totally different from in the past.

As most of you know, we have the glass half full attitude. Well this year our glass runith over. We seen tremendous spring bull sales, much needed rain, lots of grass, and smaller than per usual cow numbers throughout North America, than we have seen in years. The cattleman is poised for a big payday, and many days' in the sun are ahead. This falls commercial calf run will be exciting to say the least. By late fall the cattle purchased early may very well be viewed as some of the best invested dollars in years!

The sale cattle can be viewed any time, and will be home from pasture about three or four days prior to the sale. Friday evening we will have supper at 5:30, followed by "Treasure's" female sale at 7:00, and then the big social hoedown. As mentioned earlier this is a family event, so bring the kids. Mackenzie and Garren will have something planned again this year. Also for those of you staying in town both hotel do have waterslides for all ages of kids, or your welcome to bring your RV's and camp at the farm. Back after popular demand "Wooden Nickel" will be entertaining again this year, and although there is no scheduled cattle tour, we will be organizing a tour for Saturday.

We look forward to seeing you on Friday, August 20th, and if you have any questions or wish to stop in and view the sale cattle prior to sale time, don't hesitate to give us a call.

See you there. Dan, Karen, Mackenzie & Garren Skeels

TERMS & CONDITIONS

TERMS: The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

CERTIFICATE OF REGISTRY: After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

DELIVERY: Delivery will be made to purchasers in Central Regions of Western Canada, at the convenience of Anchor D Ranch, and buyers risk. Any animals going to other areas, trucking will be arranged by Anchor D Ranch at cost.

FLECKVIEH STATUS: Only Fullblood Simmentals with a minimum of 5 generations in their pedigree all back to Germany or Austria will be considered Full Fleckvieh. It is recommended if further research is required to check with the Simmental Association.

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

ACCIDENTS: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales staff, auctioneer or Anchor D Ranch or consignors assumes any responsibility in the matter and disclaims any liability, legal or otherwise in the event of accident or loss or property.

Exposed to Anchor D Rawlins 16R -651046- March 27 to May 20. No observed breeding. Preg tested to calve early January, 2011

"Vanessa" seemed like the most logical choice to be Lot # 1. I've always maintained that if you won't miss them, then you haven't dug deep enough into the pen, and "Vanessa" will certainly be missed. Her dam "Emily" has been as solid of producer for us as we have. She has produced 5 bulls to date, of which 4 of them have been the lead off lots in our bull sale. Herd bulls from this great cow have majestically roamed the pastures of Lewis Farms, Wolf Farms, and Stone Simmentals, all of which have been full sibs to Vanessa. We also sold a flush on this great cow in the inaugural "Treasures" sale, going to Hairy Hill Cattle Co. With the exception of 1 daughter retained in our herd, the full sibs have averaged just shy of \$9000. Her sire "Native Son" added more to our breeding program than any other bull we've owned. We just sold him this spring to Swantewitt Simmentals, to continue breeding at age 11! "Vanessa" is his only daughter offered for sale, and is a definite feature, with the stats to back her.

AI'd to Richmond Regis -507260- April 8, 2010. Exposed to Anchor D Rawlins May 4 to May 20. Preg tested safe to AI, due January 17, 2011.

This year we didn't have as many "Razzmatazz" daughters, as he ran extremely heavy to bull calves. I felt it was necessary to share an elite daughter of his however, as he has secured himself in our bull battery as the go to guy. His sons are highly sought after by our bull customers. Now with his second set of daughters in full production, I feel it's very safe to say he is one of the great herd bulls today. You can count on growth, pigmentation, hair, superb length, and phenomenal dispositions. "Victoria" is very similar to "Rosetta", a half sister who was one of last year's high sellers going to Jim Leslie, ON. "Victoria's" dam is an awesome "Appollo" daughter, going back to one of the cows we imported from Arnold Bros. She too had a daughter in last year's sale, going to Marc Boisvert, PQ. Marc said her "Rawlins" bull calf may be one of his best. To add another special dimension, she is AI'd to Richmond Regis. "Victoria" is a powerhouse that will be tough to keep a secret.

Exposed to Gibby's TNT -P676975- March 27 to May 11. Observed bred April 6, due January 15, 2011.

"Venetia" is a super stout made Picasso daughter, who was tagged as a sale heifer the day she was born. She will be a very honest brood cow that should maintain her body condition, and be virtually maintenance free. Perhaps she may not grab the attention that some of the others will sale day, however she will be an extremely hard worker that should have no difficulty placing herd bulls into you pen. Her lineage promotes calving ease, and being bred to "TNT" only secures that portion of the puzzle. If she is indeed carrying a bull calf. You could very well raise a calf that will be highly sought after. A very good solid choice.

AI'd to Anchor D Venom 111W -P716203- April 1. Exposed to Anchor D Rawlins May 4 to May 20. Preg tested safe to AI date, due January 10, 2011.

This years offering for "Treasures" does have some very extra special gems in the group, and "Venosta" is one of those. The Picasso daughters we have producing are amazing, and offer style, balance, and performance to any program. "Venosta" boasts an outstanding pedigree, backed by two of our top cow families in "Dorothy & Desiree". We then AI'd her back to "Venom", one of our high selling bulls from this spring, selling to Gist Simmentals. This mating adds the third of our top cow families into the mix, in "Herlinde", as well as the opportunity to have one of the very first "Venom" calves born. I am very excited about this total package, and regardless of what you get for a calf, it could be the next big thing. "Venosta" is a true sale feature.

I must admit, this is a heifer I had no intentions on selling, without question she is out of the keeper pen. Her dam produced a top notched heifer in last years sale (also lot # 5) selling to DJ Farms in Ontario. If you remember my footnotes you will know she was one of my favorites, as is "Reeva". Because she is smooth polled, and bred to "Venom" I felt it was necessary for her to be added into the sale. Imagine the possibility of producing a potential homozygous polled calf from this deep bodied powerhouse, with a bit of a new twist on pedigree. Now if that doesn't just give you a warm fuzzy feeling nothing will. "Reeva" is one of the heifers that needs to be seriously looked at as a potential donor or foundation female.

Exposed to Anchor D Rawlins -651046- March 27 to May 20. Observed bred April 1 due January 10, 2011.

This spring we did a bit of restructuring in our bull battery, so that we will be able to incorporate some new genetics into our herd. "Picasso" was sold to Jim Leslie in Ontario, so his daughters are of a bit more value now to us. "Dutchess" will be a very respectable purchase for someone. Although the cow family she hales from has never been promoted as highly as some of our others, the "Ms Western 37A" was always a cow I could count on to get'er done, and then some. "Dutchess" is a nice polled heifer that will be a workhorse. She has been bred to "Rawlins" for an early January calf, and encourage you to look at lot # 15 for an idea as to what the offspring may develop to be like.

Every sale seems to have one sad story, and "Fiona" holds that title this year. One of the youngest heifers in the offering, and then orphaned at an early age "Fiona" has pretty well done it on her own. We did manage to graft her onto a foster mom, so she was raised like a twin, so she does tend to be a bit smaller; however since going to grass she has really come on. "Fiona" has the pedigree to be a powerhouse. Also factor in the fact that she is smooth polled, and nearly solid red and we have a star in the making. Bred early to Rawlins, this is a very fertile young female that will make a great brood cow.

AI'd to BHR Three Sixes L666E -T600899- April 7. Exposed to Anchor D Rawlins May 4 to May 20. Preg tested safe to AI, due January 16, 2011.

"Vienna" comes from an outstanding young female that we own in partnership with BHR, and BLI. "Vienna" is the natural calf from "Irene", who was in the donor program, and we wanted to get her bred back, too keep her in production, hence she was inserted into the fall program. I liked this heifer so much we bred her back the same way again, and she has a fabulous bull calf this year by "Stride". "Vienna" has lots of power, and potential, yet is in a very feminine package. This is a very unique opportunity for someone to add a full South African female into your program, and develop your own new line of genetics. She has been AI'd back to "Three Sixes" so you will get a full South calf, but she is the type you'll be able to breed anyway you desire.

"Marie" is a very stylish, flashy heifer. So much so, that when Mackenzie picked her 4-H heifer from the entire group of heifers, "Marie" was in the final 3. This past year saw our first group of "Stride" daughters calve, and boy are they solid. I believe when they peek, and reach full production level, they could very well be at the backbone of our herd bull producing assembly line. "Marie" will be no different. Great cow family, great look, great credentials, here is a great opportunity.

Exposed to Gibby's TNT -P676975- March 27 to May 11. No observed breeding. Preg tested to calve early January, 2011.

Here is a big deep ribbed heifer that comes from the same cow family as Lot # 1. We sold her grandmother, "Esmaralda" as a bred heifer in the Bighorn Parkland sale, where she was the high seller going to Dreamland Simmentals, in New Brunswick. We were fortunate enough to purchase a daughter back, "Whiskey Girl", and she has not disappointed us to say the least. "Go Go" has that incredible "Stride" thickness, and length, and looks to be a great addition to any herd. You will have noticed that there are several heifers bred back to "TNT". He did a great job for us last year in the heifer pen, and I think the combination of "Go Go & TNT" will be explosive!!

Last year I pondered putting "Aggie" in with her mom as a choice pair. She has been a stand out from day one. Although this is one of our smaller, and less known cow families, the old "Image 21J" cow left a mark in our breeding program. Interestingly enough I dare say, if we wouldn't have had some of the stellar individuals we had, she could have easily anchored any breeding program. Having said all that, this is a great chance to purchase a female that could become an elite female herself. When you stop and analyze the entire makeup of "Aggie", I think you will agree that she is very hard to fault. Once again bred back to "TNT", and this appears to be the type of female he excels on. This will be a super cross.

"Vista" is the first of the "Rawlins" daughters to be offered for sale, and she's a dandy. When you look at her pedigree, it reads like a who's who of the breed. She is bred for carcass merit, calving ease, maternal, and growth; she truly covers the whole spectrum. Yet another heifer that I would have been more than happy to retain for our own program, but to gather the numbers she's in. I don't necessarily see this heifer as one of the big dollar attention getters, but mark my word she will generate as many dollars in her life time as any. You'll note all the Rawlins daughters are bred to "TNT" for yet another shot of calving ease. Oh ya those calves will all be polled.

"Cloe" comes from the same cow family as lot # 5. I think you may have gathered by reading my footnotes there I am quite high on her. Well "Cloe" too is a very well put together individual. Keep in mind like all the "Rawlins" daughters she is from just a first calver. I think when you totally analyze her you will truly appreciate what all she has to offer. On a side note "Rawlins" has sired several of these red faced cattle, as well as her grand sire "Native Son". If color is high on your priority list, then you will like the fact that it is breed deep through out this pedigree. Once again mated to "TNT", who has also sired his share of blaze faced calves. There is a pattern here.

"Misty" will be Garren's very first female consignment. Every year I pick one heifer that we mark as the untouchable for ourselves. In the "T" year there were two, and "Misty's" dam "Tyra" was one of them. This is an outstanding female, that is as correct as you will find, plus has that great "Razzmatazz" disposition that makes them kid friendly. Although she is a bit smaller than some of the others, when you look at this pedigree, you will see it is stacked with all stars, and she will darn sure produce them. Once again a very middle of the road, low maintenance female that will reap big rewards.

Exposed to Gibby's TNT -P676975- March 27 to May 11. Observed bred April 5, due January 14, 2011.

"Wataga" is a pretty cool package. I really encourage you to have a hard look at these "Rawlins" daughters. He is a bull that is definitely more than just a calving ease bull. There is a ton of pedigree to back him, and the bottom side of this heifer's pedigree is also quite good, with her dam being a full sister to one of our feature lots, # 4. Not only that but she also comes carrying the polled factor. Now couple that with the mating to "TNT" and you now have a bun in the over that could be worth a whole lot more. This is a heifer that could secure a special place in the industry, where better to do that than at your home.

Here is a powerful full South African heifer. Her sire "Avalanche" is a bull we produced from "Irene" and was a feature bull in our sale a few years ago. He now works at R-Five Simmentals. We had 5 calves from him last year, and they were all among the top in performance, both bulls and heifers. "Whitney's" dam has also been super productive, and has a "Nacobi" bull calf this year, that is amazingly good. I think "Whitney" has a great future destined for her. The great part about her is she has a unique enough pedigree and so many options, that you can breed her however you desire, and there is enough jam here to make a great one.

Even though "Lydia" is the baby of the offering, she is a big powerful female. As I mentioned in the previous lot, if you want to add some performance and power into your program, have a look at these "Avalanche" daughters. "Lydia's" dam produced our second high seller in our first sale, selling to Crimson Tide Fleckvieh in Ontario. She has now moved into their donor pen, and has secured a spot as an anchor in their program. As well her grandmother "Dorothy" was without doubt the top cow to ever walk our pastures. "Lydia" has unlimited potential, and will certainly make an impact.

"Susi" is a very feminine, clean fronted, attractive female. She traces back to our original Full Fleckvieh cow family, in "Aster". Her dam has always been a very consistent producer for us. Her sire, "Serengetti" is a bull that had been used both on cows and heifers, with success. We were going to use him again on heifers this year, but due to his size we only used him on cows, and then was sold to T Valley Farms for their commercial cow herd. He is a bull that possessed extreme muscle, and length, added growth, and moderated birth weights for us. When "Susi" is a mature cow, I'm sure she will be a front pasture type female. She will be a very good choice.

It was a tough decision to part with "Sabrina", but a decision that should reap huge rewards for her new owner. As you know I am a huge believer in the strengths in cow families. I was very impressed with her grand dam, when I seen her, and we were incidentally the runner up bidder on her dam when she sold as a bred heifer. When presented the opportunity to purchase a flush on this great female I jumped at the chance. This is not a pedigree you will stumble across every day, which makes her just that much more of a precious gem. Combine that with a locked in color pattern, on both sides of her pedigree, and you do indeed have something quite rare.

Over the years, some of our greatest producing cows for us have been the "Meister" daughters. Certainly some older genetics here, that have been tried, tested and true. A combination of muscle, growth, performance, and no lack of milk in this combo. "Millie" will be a female that should raise bulls on a consistent basis, and produce awesome females as well. She too is another female I had no intentions on parting with, as she won't be the prettiest in the pen, but will be a rock solid producer. If you want one that will produce for years, and simply get the job done, then "Millie" is the right choice.

Our program has been very focused on producing bulls for our commercial cliental; I think what got us there is by having such a strong core of females. That is part of the reason we have chose to share a few of those producing females, in their prime, in the sale. We also use this to showcase our bull battery, which don't have a bred represented in the sale. Firstly "Whiskey Girl" has been a solid producer for us. The top side of her pedigree is somewhat different for our herd, and the bottom bases back to one of our foundation females. "Bacardi" is the first representative to sell for "Mojito". We have used several of our own genetics through AI, but it has been 12 years since we outright kept one of our own bulls for our program. This spring when his calves hit the ground, you couldn't wipe the smile off my face, and the interest his bull calves have already gathered is outstanding. His calves hit the ground running, and never looked back. They are very uniform in size shape and color, and certainly have a pedigree to work with. "Bacardi" is a long bodied, stylish heifer that will make an awesome brood cow, and has potential to turn a few heads in a show ring. Any youngsters needing a heifer project have a close look. As in the past, one will sell; the other will remain in our herd.

22

Exposed to Gibby's TNT –P676975- March 20 to April 20. Exposed to Bar 5 Stride 413P, April 21 to May 24. Observed bred March 23, due January 1, 2011.

This is a fabulous pair. "Dynamite" is just that, she is awesome, and the first "TNT" calf to hit a sales ring. I feel she is a strong representative of what he can offer. He did a great job on birth weights for us, so much so that he received more heifers this year than last year. Obviously with him being homozygous polled, all the calves are polled, and he loaded them with pigmentation. They all possess super length of spine, and are very smooth. "Platinum" is a great young cow, sired by our old faithful "Regis". His daughters have all been great producers for us. "Platinum" comes from a super cow family, that has been rock solid for us. She has produced both marketable bulls and heifers for us on a very consistent basis. A moderate framed cow, with good body mass, lots of milk, and is just damn productive. We bred her back the same way, and I think you will agree that was a good decision when you see her calf. Which ever one you take, you will be buying into a productive cow family, that will work extra hard every time.

After several years of arm twisting, I finally convinced Ross to part with this elite female. I was more than excited to add her into our donor program. "Elexis" is a cow that I have admired from a calf, and watched her grow and develop into a strong matron in the Dora Lee program over the years. She has a strong pedigree, backed by one of the key cows in their program "SRN Ms Western 2Y". The fact that she is polled is absolutely a bonus. She has produced extremely well in their program, with a variety of bulls. To date her most famous offspring would be "Dora Lee Eclipse", who has left his mark in several herds. We have kept her open this year to keep her in and worked her into the donor program. She has been flush 3 times producing us 26 freezable embryos. The buyer will purchase the right to flush "Elexis" to their choice of bull. The flush will be done at Anchor D Ranch, by Alta Embryo Group, and we will pay for the flush. We will guarantee 6 freezable embryos, with anything over 10 being split between buyer and seller, buyer receiving the even numbers. Flush can be done immediately, and we ask that it is done no later than January.

Although our program is basically known as a Full Fleckvieh operation, we do have a very solid core of Purebred cows. "Valentina" is a female I am very proud of. Just like the Fullblood division, we have focused on cow families, and this is a good one. Her sire "Galaxy" provided us with lots of growth, performance, thickness, muscle, and eye appeal. He is an impressive individual to see in the flesh. Same philosophy here, if we wouldn't miss them we haven't searched hard enough. "Valentina" will leave a large void in our pen. Mated back to "Terminator", this will be a great genetic cross.

We leased Nathan Stones cows, and for simplification the calves are all sold for accounting purposes. I guarantee you all three of these black heifers, are heifers anyone would love to have, and be quite proud of. "Wadena" is a big powerful heifer, with lots of capacity and super length. As the majority of the calves sire by "Galaxy" they have super dispositions. I really feel the purebred heifers we have in the sale are starting to register where we are headed with this program. This is a heifer that will be a bull producing machine, and will be missed here. I can't brag on our "Robin Hood" cows enough, and as you can see that's exactly who she is bred back to. Bull or heifer, this will be a nice mating.

The selection process for our purebred heifers in the sale was quite simple. If they were multi polled, and multi red, they are in, with the exception of one. "Leona" is a heifer I would love to keep. Backed by a great cow family, that always produced us top notched bull calves, she will be one hell of a brood cow. Her grandmother "Roggie" still boasts a record here that may never be broken. She had 11 natural calves, of which 6 were bulls. They all sold to Hutterite Colonies except one that went to a Purebred operation. I think that says a lot about the quality this cow family can produce.

AI'd to KS Bravado P68 -PG634254- March 31, due January 9, 2011. (No exposure)

In the time that "Painted Smile" has been on our farm, she continues to impress me. She is without question the type of female that anyone would like to have in their program. Last year she produced a great female that sold to Mud Butte Simmentals. Her daughter this year, "Verna" is also top notch. I have been delighted with the outstanding group of calves that her sire, "Terminator" has produced. He is homozygous polled, and his calves are very correct, have lots of growth, and muscle shape, and we are fortunate in the fact he can work in a heifer pen as well. This is a great young female that you could build a program around. Being bred to Bravado just solidifies this package.

"Wynne" is a 3/4 sister to the previous lot, and is very similar in make up. A great chance to work on putting together a strong cow family in these two lots. I think the real bonus to this heifer is how she is bred back. The "Red Teddy" calves have been some of the easiest cattle to market over the past few years, and a black Teddy calf, with this strong of family behind them should make for one very sought after individual. As I mentioned before, there are only three black heifers in our entire program, and all three are in the sale. They are definite keepers.

 As I just finished bragging on "Red Teddy", here is an opportunity to purchase a direct daughter. "Meg" is from a fabulous "Red Canadian" first calver, backed by yet another strong cow family. There will be extra muscle expression here, and has all the other key ingredients as well to be a good one. She has been bred back to "Terminator" who has really impressed us by what all he has contributed to our program. The resulting calf will be polled, with a moderate birth weight that should be very easy to market. This photo does not do this gal justice, she is much thicker and stylish than appears here.

 We only have 2 "Powercat" daughters in our herd, but if they are all as good as them I would love to have a few more. We purchased "Mocha's" dam from Porter's reduction sale, and I know from seeing what this cow had produced for them, and with some encouragement from Kevin, she was defiantly one we wanted to add into our program. This past spring we seen several of the very first "Red Texas" bulls sold, and they were extremely popular. This is a neat blend of genetics, and something somewhat new for your appraisal. Take advantage.

TREASURE CHEST LOT

We have had lots of fun with the “Treasure” lot the past two years. Last year, we put a whole new twist on things, with a reward being offered to who figured out what the “Treasure” lot was. We will be doing that again, and will announce any winners prior to the sale. This year will not be quite as easy to figure out though. Your clues are; there are more than 4 and less than 10 chances to find the right treasure or treasures. Truly rare gems that are simply out of this world. Regardless if you’re looking for Ruby’s, Pearl’s, Emerald’s or just a Lucky Charm, they are all there. Good luck.
PS. Blaine don’t try bribing the kids!

Pedigree is of resulting mating.

Prospect Hill Simmentals is consigning 4 embryos from one of our power cows BHR Baroness. We purchased her in Calgary at the World Congress from Buzzard Hollow, and she has not disappointed us yet. She has developed from a strong bred heifer into an awesome donor cow. Her depth, feet, udder and disposition are just a few reasons why we like her so much. These embryos mated to Stride was a no brainer, as we all know the positive effect that he has had at Anchor D. Dan always appreciates Baroness when he tours our farm, so much that last year at our sale he bought her natural bred heifer calf. She entered our donor program in 2009 and was flushed three times. Those three flushes produced 46 embryos. She has proven to be a power house cow both in the field and in the donor program. When you get calves on the ground, you will see why she’s one of our favourites. PHS guarantees a 50% conception rate if the embryos are planted by a certified embryologist.

Preg test safe in the Vets opinion, due to calve mid to end of February. Exposed Anchor D Narcissus March 23/2020-June 7/2010

Here is a great heifer that goes back to one of our best producing cows, MRLN Lacey who we purchased out of Marralyn's dispersal as an open heifer. The top side has one of our newer editions to our herd sire line up. Torque is a polled bull that we purchased from Porter Ranches, he has been a great addition to our program as you can see here. This is Torques first group of bred heifers and the first one we have offered for sale. Torque is proving to be a great female producer; they have loads of thickness, lots of hind quarter, and great dispositions. This heifer is going to make a great cow I think that she will prove to be one of those foundation females! Waneta was preg checked and in the vets opinion she is safe to calve mid to end of Feb.

AI date April 20th TNT, exposed May 1-24, bred natural May 10 TNT. Exposed May 24-June 7 Narcissus. PT safe to May 10 TNT. Due Feb 20th.

After thinking long and hard I decided that I would put a bred heifer in Danny and Karen's sale. I knew it would have to be my best heifer and even though I didn't want to part with her, I am offering her to you today. Words cannot begin to describe this little lady; she will definitely produce a polled TNT calf that you will not be disappointed in. Dynamite and TNT will give you one explosion of a calf!!

Open and Ready to Flush

Here is an opportunity to purchase a proven herd matron. High selling bred heifer fleck fest 2002. She has been my donor cow ever since. Just ask Danny what he thinks of this cow he sold a bred heifer out of a flush he bought for \$8100. A full sister to Jahari. She flushes very well. Very sad to see this cow go.

This girl is smooth polled with the muscling of a horned heifer. This heifer has caught my eye right from birth and anyone who has come to the farm. X-celent's dam is fast coming one of my top cows, good uddered, great feet and very consistent on her calves.
